EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William C. Cahill on May 1, 2006.

The application has been amended as follows:

Claim 1, at the end of claim after "address code" replace "." with --;-- and add these steps,

- (f) a coupling device for coupling the control signal to a control input of the animal training device; and
- (g) a test circuit responsive to a test switch for testing continuity of the coupling by the coupling device.

Claim 4, at the end of claim after "audio signals" replace "." with --;-- and add these steps,

- (f) a coupling device for coupling the control signal to a control input of the animal training device; and
- (g) a test circuit responsive to a test switch for testing continuity of the coupling by the coupling device.

Claim 7, in step (c) after "input of" replace "a" with -the--after "launching device" insert -that associated with the animal training device—

Art Unit: 2612

Claim 9, in step (c) after "respectively" insert –that associated with the animal training device—

Claim 18, line 1 replace "16" with -9—

Claim 20, in step (d) after "respectively" insert –that associated with an animal training device—

Claim 27, in step (c) after "respectively" insert –that associated with the animal training device—

Claim 28, in step (d) after "respectively" insert –that associated with an animal training device—

2. The following is an examiner's statement of reasons for allowance: The present invention is directed to an animal training device. Each independent claim identifies the uniquely distinct features "a remotely transmitter that transmits control signals to an animal training device, the animal training device is coupled to a launching device, a coupling device for coupling a receiver unit to a control input of the animal training device, and a test circuit responsive to a test switch for testing continuity of the coupling by the coupling device" in combination with the manner claimed. The closest prior art, Lalor US 5,983,551 and Sasaki et al. US 6,35,601 disclose similarly invention, however both fail to disclose the limitation described above, therefore, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Application/Control Number: 10/773,138

Art Unit: 2612

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Son M. Tang whose telephone number is (571)272-2962. The

examiner can normally be reached on 4/9 First Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Daniel J. Wu can be reached on (571)272-2964. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
